

Compostology is a soon-to-be nonprofit diverting school food waste from incinerators to compost facilities. You can visit [linktree.com/compostology](http://linktree.com/compostology) to learn more about our progress including receiving \$48K, read about the Maryland Coalition to Re-Imagine School Waste on Maryland Matters, and/or donate as much or as little as you would like to our new GoFundMe. You can also follow us on Instagram @compostologymd for updates. Please feel free to contact us at [angelina.xu.9282@gmail.com](mailto:angelina.xu.9282@gmail.com) or [advika.agarw@gmail.com](mailto:advika.agarw@gmail.com) with any questions or if you/your organization would like to get in touch with us!

Why is this important?

- An MCPS elementary school creates 700 lbs of daily waste.
- We found that in just 100 lbs (2 bags), 40 lbs were compostable and another 42 lbs were liquids.
- Right now, this all goes to incinerators and contributes to GHG emissions. Meanwhile, our programs divert at minimum 800 lbs of waste (each month per school) to composting, which offsets GHG emissions by allowing the soil to sequester more carbon.
